

## Ti-Through-Drain (Plastic Conduit Pipe for Pavement Body)

### 【Diameter】

- 15mm, 20mm and 30mm

### 【Features】

- Safe even when pavement is compacted because the material of resin has high heat resistance and high rigidity.
- Disposal with asphalt block by cutting or crush.
- Rather small stretch and contract as well as meandering because it consists of rigid pipe and flexible joint, which makes it possible to be installed along with curves and undulations of a road.

### 【Applications】

- Discharging of infiltrated water of drainage, low noise, and high functional pavement.

- These descriptions can be altered for a reason of improvement without any notification.
- These descriptions shall be as of April 1, 2010.
